PROFESSIONAL SUMMARY

Computer Science Engineering graduate (VTU, 2026) and full stack developer intern with hands-on experience building web applications using React.js, Next.js, TypeScript and Node.js, and backend systems in Java. Experienced in designing REST APIs, relational and NoSQL databases (MySQL, PostgreSQL, MongoDB), JWT authentication, unit testing and Docker. Has built LLM-powered applications and a native Android app in Kotlin, and uses AI-assisted development tools daily. Looking for entry-level software engineering roles.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), JavaScript, TypeScript, SQL, HTML5, CSS3, Python (basics), Kotlin

Front End: React.js, Next.js, Tailwind CSS, responsive UI, component-based architecture, state management

Back End: Node.js, Express.js, NestJS, REST APIs, JWT authentication, JDBC, Maven, Spring Framework (learning)

Databases: MySQL, PostgreSQL, MongoDB, NoSQL, Drizzle ORM, schema design

Tools & DevOps: Git, GitHub, Docker, Docker Compose, Linux, Vercel, Cloudflare Tunnel, Jest (unit testing)

AI: OpenAI & Gemini APIs, prompt engineering, AI-assisted development (Claude), scikit-learn, Pandas

Concepts: OOP, DAO design pattern, MVC architecture, monorepo (Turborepo), code reviews, agile practices

EXPERIENCE

Full Stack Developer Intern (Java & AI) | Vstand4U Solutions Pvt. Ltd.

Feb 2026 – Jul 2026

- Developed a standalone Hospital Management System in Core Java using the DAO design pattern, separating data-access logic from the UI for patient, doctor and appointment workflows.
- Designed a relational MySQL schema (patients, doctors, appointments linked by foreign keys) and implemented full CRUD operations through JDBC PreparedStatements to prevent SQL injection; managed builds with Maven.
- Trained in AI/ML, generative AI and prompt engineering, and applied LLM APIs in Java-based projects. Code: github.com/sultanmaliki/hospital-management-system

PROJECTS

LinkedOut – Career Platform | Next.js, NestJS, TypeScript, PostgreSQL, Docker

github.com/sultanmaliki/LinkedOut

- Co-built (2-person team) a full stack career platform where companies discover professionals, with verified company reviews, job postings, a hiring pipeline and a social feed.
- Built a NestJS REST API with JWT access/refresh-token authentication, email verification, role-based admin moderation and validated DTOs, backed by PostgreSQL and Drizzle ORM.
- Maintained 300+ Jest unit tests across 54 suites; ran builds, linting and type checks with Turborepo and pnpm workspaces, and set up local services with Docker Compose.

QueryCraft AI – Text-to-SQL Assistant | Next.js, Node.js, Express, MongoDB, LLM APIs

github.com/sultanmaliki/QueryCraft-AI

- Final-year team project (3 members): chat-based assistant that turns plain-English questions into SQL, MongoDB, Cypher and GraphQL queries, then explains and runs them on 9+ database types.
- Developed an Express.js REST backend that routes each request to a suitable LLM (Gemini, Mistral, Llama via OpenRouter/Ollama) by query complexity, with CSV upload for instant querying.
- Secured the API with JWT authentication, bcrypt password hashing, Helmet security headers and rate limiting; containerized the backend with Docker.

SetBeat – Gesture-Controlled Gym Timer (Android) | Kotlin, Jetpack Compose, Media3

github.com/sultanmaliki/setbeat

- Built an accessibility-focused stopwatch and countdown app controlled entirely by tap, swipe and two-finger gestures, so it can be used mid-workout without looking at the screen.
- Integrated Media3 to show the track playing in any music app, with a real-time beat-reactive waveform; privacy-first design with no internet permission, accounts or analytics.

EDUCATION

B.E. in Computer Science Engineering | Anjuman Institute of Technology and Management (VTU)

2022 – 2026

CGPA: 7.39 / 10 | Relevant coursework: Full Stack Development (Java), SQL & NoSQL Databases, React, JavaScript, HTML, CSS

Pre-University (PUC), Karnataka State Board | Anjuman PU College, Bhatkal

2022

SSLC (10th), KSEEB | Ali Public School, Bhatkal

2020

CERTIFICATIONS & LANGUAGES

- AI/ML, Generative AI & Prompt Engineering – Vstand4U (2026) | Project Management – LearnTube (2024) | Data Visualization & GitHub – AITM (2023) | AWS Workshop
- Languages: English, Hindi
